10th International Symposium on Medical ICT
ISMICT 2016
Worcester / Boston
March 21-23, 2016

Patron Information

Dependable Medicine using advanced Information and Communication Technology (ICT) is the focus of the 10th International Symposium on Medical Information and Communication Technology (ISMICT 2016). ISMICT 2016 aims to establish a forum or a venue to present new research and development results, exchange ideas, discuss practices, and share experiences among Technology and Medicine sides. The conference will host workshops and panel discussions on:

1. Medical Device Regulatory Science (MDRS)
2. Securing Medical Cyber-Physical Systems
3. Medical Device Interoperability
4. Medical Device Safety
5. Internet of Medical Things
6. Wireless video capsule endoscopy

Every year a number of organizations become patrons of the IEEE ISMICT as the sponsorship benefits them significantly in various aspects of their research and development programs. The event helps these organizations to identify current technologies and their level of maturity which helps them to forecast the upcoming technologies in the subsequent years. In response to a patron's contribution, the organization committee of the conference provides a benefit package to the patron's organization.

A Diamond Sponsorship will give the opportunity for a Keynote Speech which will be recorded and permanently stored on the conference webpage for open viewing; an opportunity to make the speech seen around the globe.

We are writing this letter to invite you to become a patron of the IEEE ISMICT 2016. The General Chairs of the IEEE ISMICT 2016 are pleased to provide the detailed packages for our patrons. If you have any questions or comments please feel free to contact us.

For more information please contact Ilir Progri iprogri@verizon.net, Tel: +1-508-791-3304
